State of the Art Estate Planning for Married Couples with Estates under $10 Million

Many married couples have AB Trusts, generally created ten or more years ago, which in most cases have become antiquated because of the liberalization of the estate tax laws. AB Trusts require a split into sub-trusts at the first spouse’s death, which in turn means less flexibility, more administration and accounting requirements and expenses, and potentially more capital gains taxes for your heirs. See if a simpler, more streamlined and more flexible approach works for your family.

Finding the Wild in Everyday Living: A Conversation with Adventurer Jason Mark

In his book Satellites in the High Country: Searching for the Wild in the Age of Man, journalist and adventurer Jason Mark travels beyond the bright lights and certainties of our cities to seek wilderness wherever it survives. In our local Point Reyes National Seashore, a battle over oyster farming and designated wilderness pits former allies against one another as locals wonder whether wilderness should be untouched, farmed, or something in between. During this presentation, Jason will weave stories such as this into everyday life, and show us that we can experience the magic of wilderness even in the most suburban settings. Jason Mark is the editor of Sierra, the National Magazine of Sierra Club.
